Ready to Hang or Canvas Only

Your image will be specially retouched and printed by professionals using the highest quality inks on canvas providing you with an enduring artwork.

Ready to Hang

Your canvas arrives finished ready to hang on the wall. It is stretched over a thick wooden frame, securely stapled to the back and sealed with backing tape. D rings, stainless-steel wire and Bump-ons complete the job.

Canvas Only

Your image comes rolled in a tube and you take it from there or we can send it to you in a mailing tube.

Wrap Edges

We offer four different ways to create your art print on canvas as a ready-to-hang work of art. Our canvas wrap options utilize museum quality stretcher bars providing you with a finished work.

After the canvas is stretched, you can choose to frame the wrapped canvas with one of our specialized custom frames, or display it exactly as is.

SEPIA

The benefits of choosing Fix-a-Frame to print your photos on canvas.

Experience

Fix-a-Frame has been involved in the industry since 1991 and employs fully trained and experienced staff. We have a full time graphic artist onsite to deal with all the minute details that go into producing a great image.

Technology

We only use the latest software and hardware to produce your prints. We choose Epson K3 Ultrachrome Ink which produces vivid results that when coupled with our printshield coating are guaranteed to last a lifetime. Eight inks are used to mix the perfect colours.

Media

We prints on high grade poly-cotton canvas specially treated to accept the inks and designed to stay stretched and flatter longer.

Finishing

Our prints are sealed with a coating of UV resistant varnish before being stretched over kiln-dried stretcher bars. These are then sealed on the backing with a light-weight and acid-free foamcore board which means mould cannot easily grow on the back of your image and the bugs cannot take up residence. D rings and stainless steel wire provide a secure and durable hanging solution. Bump-ons are added to the corners to promote air circulation which also helps with prevention of mould. Bump-ons also protect your walls from becoming marked and they keep your print nice and level giving you maximum viewing pleasure.

Remember...

***...many choices but choose
Fix-a-Frame to make a difference***

FAQ

How long will it take to get my Photo?

Your canvas will be delivered within 7 working days.

Can you use photos from my digital camera or iPhone ?

Yes, we can print images taken on most digital cameras. We can use JPG, PNG, TIF, PSD, RAW images and most picture formats. For best results, make sure your camera is set on the highest resolution (largest size) possible.

I only have an actual photo and not a digital file, can you work from that?

Yes, we can make prints from an actual photo or piece of flat artwork. We will make a high resolution scan and return your photo. We can also email the digital file back to you and it is all included in the price.

Do you offer any guarantees?

Your purchase comes with our 100% satisfaction guarantee and is backed with Epson's guarantee of the longevity of their products.

How long will my canvas prints last?

Under normal lighting conditions, your canvas prints will last over 100 years because of the acid free canvas printing process and canvas material.

What is the resolution of your printer?

Our printer can print up to an impressive 2880x1440 dpi and deliver a super sharp image with no banding.

How can I send you my image?

It is easy. You can email the image to us at fixaframe@optusnet.com.au with instructions and contact details, or burn it to CD and mail it to us.

What is included in your prices?

All canvas prints include:

- Red eye reduction (if required)
- A protective clear laminate & UV coating
- Image cropping & re-sizing
- Black & White or Sepia conversion (if requested)

The "Ready to Hang" price also includes:

- Canvas stretched on quality timber frame
- Taped and wired ready to hang
